AxisPointe Quality Assurance

AxisPointe's Quality Assurance program is the result of 35 years of forensic construction experience and over 5,000 litigation claims researched to identify how buildings fail and why—No other QA program can boast this pedigree. Trust AxisPointe to support your QA needs and help you build the highest quality products with the lowest risk.

At AxisPointe, we understand that your QA provider must be a team player and work with your existing infrastructure to effectuate improvements.

We've worked with and listened to builders, architects, and contractors on thousands of projects over the years. This is what gives AxisPointe unequaled insight and perspective into your QA needs.

AxisPointe Quality Assurance Services

Forensic Plan Review - utilizes a proven and unique process to efficiently identify construction conflicts, missing or incorrect details, unworkable interfaces and incompatible materials that can lead to construction delays and defects.

QA Site Audits – AxisPointe provides trained consultants for site inspections and documentation of construction activities. Our program meets any insurance requirement or underwriting obligations builders might have.

Expert consultants capture construction's best practices as well as highlight anomalies for immediate correction as warranted. All digital photos and quality data are stored in AxisPointe's proprietary, cloud-based systems for instant and secure access.

AxisPointe QA Site Audits include observation of building components deemed to be high-risk:
- Foundation-Below or at Grade
- Structural Framing
- Mechanical, Electrical, Plumbing
- Roofing Systems
- Exterior Cladding Systems
- Thermal + Energy Performance
- Life-Safety Components
- Acoustical Assemblies
- Balcony Decks
- Site
- Appliances
- Commissioning
