InSite Mobile™ - The Builder's Quality Assurance Program

AxisPointe's industry-leading InSite Mobile™ technology empowers you and your team to accomplish more, build better, and maintain the highest level of Quality Assurance for any sized project. From custom homes to high rise luxury towers, the InSite Mobile™ iPhone app eliminates paperwork, saves time, and drastically reduces your construction risk and costly call-backs. InSite Mobile™ is specifically designed to use as an internal QA/QC and Safety tool, or in concert with our comprehensive third-party consulting services.

The InSite Mobile™ platform is a field management app used to document construction, communicate between trades, and conduct quality assurance audits instantly. Tap into AxisPointe's extensive library of over 5,000 quality, safety and process "checkpoints" based on root-cause analysis of thousands of claims and construction defect cases.

Using an iPhone or iPad, a superintendent or assigned QA staff can use the InSite Mobile app to:

- Promote best practices
- Instantly capture and share unlimited data and photos
- Eliminate defective work
- Manage subcontractor vendor data
- Alert trades instantly saving valuable time and resources
- Allow trades to communicate and close their own required corrections
- Create tasks to manage construction activity or processes
- Instantly make updates to schedule
- Eliminate needless paperwork
- Build an internally managed QA program that far exceeds insurance requirements
- May qualify for rebates up to $75.00 per unit
