

AxisPointe's leading edge technologies help builders, contractors and developers accomplish complex tasks effortlessly. HomeProfile™ gives builders a powerful tool to:

- Scan policies, upload all plans, contracts, insurance papers, change orders, floor plans, HOA or CC&R documents to create an online electronic safe house for all your construction documents
- Reduce nuisance calls and provide consistent support using our intergrated Service Request System for customer service requests
- Instantly share building plans, construction documents and legal disclosures with other parties
- Create and edit trade contractor templates, product listings, and green building documentation to satisfy local ordinances and create a paperless customer experience
- Print and distribute our customized HomeProfile™ customer close of escrow book, containing all documents important to you and your customers
- Provide important building documentation disclosures for your customers and subsequent property owners
- Track customer service and out-of-warranty claims, and promote work orders to the appropriate vendors for instant tracking and scheduling
- Manufacturer warranties & maintenance manuals
- Warranty process guidelines

With HomeProfile™ all construction documents, subcontractors associated with the project, warranty and maintenance information are conveniently linked into simple and manageable templates that can be shared, customized, and stored at the click of a button.
